<u>Enable compression</u> for the following resources to reduce their transfer size by 219.9KiB (74% reduction).

- Compressing http://mytunes.raymondbrogan.com/themes/mytunes/style.css could save 67.5KiB (82% reduction).

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 4 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Remove render-blocking JavaScript:

- http://mytunes.raymondbrogan.com/themes/mytunes/js/jquery.js
- http://mytunes.raymondbrogan.com/themes/mytunes/js/jquery.timeago.js
- http://mytunes.raymondbrogan.com/themes/mytunes/js/functions.js
- http://mytunes.raymondbrogan.com/themes/mytunes/js/jquery.jplayer.min.js

Optimize CSS Delivery of the following:

- http://mytunes.raymondbrogan.com/themes/mytunes/style.css
- https://fonts.googleapis.com/css?family=Open+Sans:700,300,800,400

Optimize images

Properly formatting and compressing images can save many bytes of data.

Optimize the following images to reduce their size by 424.5KiB (74% reduction).

 Compressing http://mytunes.raymondbrogan.com/themes/mytunes/images/background.png could save 347.1KiB (71% reduction).

- Compressing http://mytunes.raymondbrogan.com/themes/mytunes/images/logo.png could save 69.5KiB (91% reduction).
- Compressing and resizing http://mytunes.raymondbrogan.com/themes/mytunes/images/register.png could save 7.9KiB (91% reduction).

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

<u>Leverage browser caching</u> for the following cacheable resources:
